RE: Lower Longview Lake Dam Project Update

Dear Resident(s):

There are several developments that I'd like to share with you regarding the progress of the Lower Longview Lake Dam rehabilitation project and partial dredging of the lake.

A 12-month construction contract with D.H. Griffin Infrastructure, LLC, has been signed for the dam rehabilitation portion of the project. The expectation is for construction to begin in late March with the project being completed at the end of April 2018. Partial dredging of the lake will be included under the same contract and will begin in Summer 2017.

Draining of the lake will be one of the first operations to occur. This will be done in a controlled manner and, for this reason, will take several weeks to complete. Please be advised that pumps will be running continuously until the lake is fully drained.

The Stormwater Management Division and D.H. Griffin are dedicated to minimizing impacts to you during construction. Work hours will be Monday – Friday from 7 a.m. – 6 p.m. with no work scheduled on the weekend except in an emergency or with prior approval from the City. You will be notified if such a schedule change needs to take place.

If you have any questions or concerns, please contact me at 919-996-3940 or [Gilles.Bellot@raleighnc.gov](mailto:Gilles.Bellot@raleighnc.gov). After-hours inquiries can be directed to Kingsley Enyinnaya (919-454-8370) or Oscar Puga (704-239-0290), Project Manager and Site Superintendent for the contractor.

Sincerely,

Gilles Bellot, PE  
Project Manager

cc: Veronica High, PE – Infrastructure Projects Manager
